

Subject	Geography	
Week	Learning	Activities
Week beginning 8 th June	The structure of the earth: In this lesson, you will learn about the structure of the Earth. You will learn about the different layers that make up the Earth's structure, and the differences between the two types of Earth's crust.	https://www.thenational.academy/year- 8/geography/the-structure-of-the-earth-year- 8-wk1-1 Follow the instructions and guidance to watch the video and work through the tasks.
Week beginning 15 th June	The theory of continental drift: In this lesson, you will be learning about the theory of continental drift. This will build on our learning from lesson 1, where we learnt about the structure of the earth. In this lesson, you will learn about what continental drift is, and the evidence there is to support the theory.	https://www.thenational.academy/year- 8/geography/the-theory-of-continental-drift- year-8-wk1-2 Follow the instructions and guidance to watch the video and work through the tasks.
Week beginning 22 nd June	Plate boundaries: In this lesson you will learn what a plate boundary is and the different types of plate boundaries that exist, and what happens at each of them.	https://www.thenational.academy/year- 8/geography/plate-boundaries-year-8-wk2-1 Follow the instructions and guidance to watch the video and work through the tasks.
Week beginning 29 th June	The world's major tectonic plates: In today's lesson you will learn about the world's major and minor tectonic plates and what causes these plates to move.	https://www.thenational.academy/year- 8/geography/the-worlds-major-tectonic- plates-year-8-wk2-2 Follow the instructions and guidance to watch the video and work through the tasks.
Week beginning 6 th July	What are earthquake and why do they occur?: In today's lesson we will be looking at what earthquakes are and what causes them to happen. We will then go on to study the different parts of an earthquake.	https://www.thenational.academy/year- 8/geography/what-are-earthquakes-and- why-do-they-occur-year-8-wk3-1 Follow the instructions and guidance to watch the video and work through the tasks.
Week beginning 13 th July	How can we measure earthquakes?: In today's lesson we will study the different ways in which scientists measure earthquakes. We will compare the benefits and drawbacks of different scales and look at how much damage is likely to occur after earthquakes of different sizes.	https://www.thenational.academy/year- 8/geography/how-can-we-measure- earthquakes-year-8-wk3-2 Follow the instructions and guidance to watch the video and work through the tasks.
